Excessive CB errors

Published 12/12/2000

Symptom(s):

Excessive CB Errors
System panics with various hardware related panics
Error: 'WARNING: Excessive retries (7559/min) on

    '

Core dump shows 1000s of CB errors

Fact(s):

SGI Origin 2000
IRIX 6.5.7m
128 CPU

SGI Solution:

Replace MetaRouter and midplane on modules associated with the excessive CB errors.

Cause(s):

Mixtue of bad meta router and bad midplane causes too many CB errors for the system to recover from.
